Acronis Cyber Protect Cloud:
Working with Datto made simple

datto | AUTOTASK PSA

More visibility, more control

Streamline provisioning, simplify management and automate the billing of your cyber protection services with the Acronis-Autotask PSA integration.

September 2021: Bill clients automatically for their actual resource usage with pay-as-you-go billing

November 2021: See all changes made in Acronis' management console related to Autotask PSA services and contracts, and vice versa

Integration benefits for service providers

- **Extend your managed services** with integrated cyber protection - with no upfront investment
- **Automate billing** for subscriptions or actual usage of your services with either prepaid or pay-as-you-go options
- **Provision comprehensive cyber protection services** right from the Autotask PSA interface
- **Respond to client issues faster** with synchronized Acronis-Autotask PSA alerts and ticket automation

datto | RMM   **In Lighthouse Program**

Work smarter, not harder

Protect all client data and be alerted to issues through the same, trusted Datto RMM interface you use to manage your customer environments.

October 2021: Deploy, monitor and manage Acronis cyber protection directly within Datto RMM by leveraging the integration

Join Datto RMM Lighthouse program: Get a white-glove onboarding service by being one of the first 10 participants to benefit from the Datto RMM integration

Integration benefits for service providers

- **Remotely deploy Acronis' cyber protection agent** to any Windows, Mac or Linux endpoint that you manage in Datto RMM
- **Assign sophisticated cyber protection plans** to one or multiple accounts right from the start – and monitor their status by using Datto RMM monitoring tools
- **Respond to client issues faster** with synchronized Acronis-Datto RMM alerts and automated ticketing
- **Customize the integration** by adding manual or automated solutions – *E.g. Set a monitor to check if a successful backup has been run in the last few hours. If not, automatically run it without waiting for the next scheduled backup.*

Start a free 30-day trial
Integrating is easy once you are in your Acronis Cyber Protect Cloud account.
