

# Acronis

#CyberFit

# Acronis Cyber Protect Cloud

Modernize your cybersecurity and backup with integrated cyber protection

Dual headquarters  
in Switzerland and Singapore

# The threat landscape is becoming more complex

**300%**

**spike in cybercrime  
during the COVID-19  
pandemic**

**57%**

**of attacks are missed by  
traditional antivirus  
solutions**

**69%**

**spend more time managing  
tools than defending  
against the threats**

**Sources:** Acronis Cyberthreats Report 2020, Acronis Cyber Readiness Report, 2020, FBI

# What if you could rely on just one integrated solution?

## Boost your monthly recurring revenue

- Easier upsells using integrated solutions
- Simplified renewals with integrated reporting
- Greater ROI via pre-built marketing campaigns

## Cut cyber protection costs by up to 50%

- One console, one license, one agent
- Integration drives deeper automation
- Consolidate vendor expenses

## Deliver unmatched cyber protection

- Reduce risk with 100% coverage of client workloads
- Unique capabilities not available from your current security vendors
- Leader in independent testing (VB100, AV-Test, AV-Comparatives)

# AI-powered integration of data protection and cybersecurity

## Prevention

Smart protection plans based on Acronis threat alerts

## Detection

AI/ML-based threat detection and behavior analysis

## Response

Attack response with complete AI-assisted visibility on the edge

## Recovery

Attack remediation without data loss and with integrated patching

## Forensics

Fast and precise investigations with forensic-rich backups

# Best-in-breed Backup with Integrated Security and Management

Protect every workload  
at no charge

Best-in-breed backup  
included

Strengthens your AV  
against zero-day threats

Accelerate security  
and manageability

# Add Advanced Packs: Security, Management, Backup, Disaster Recovery

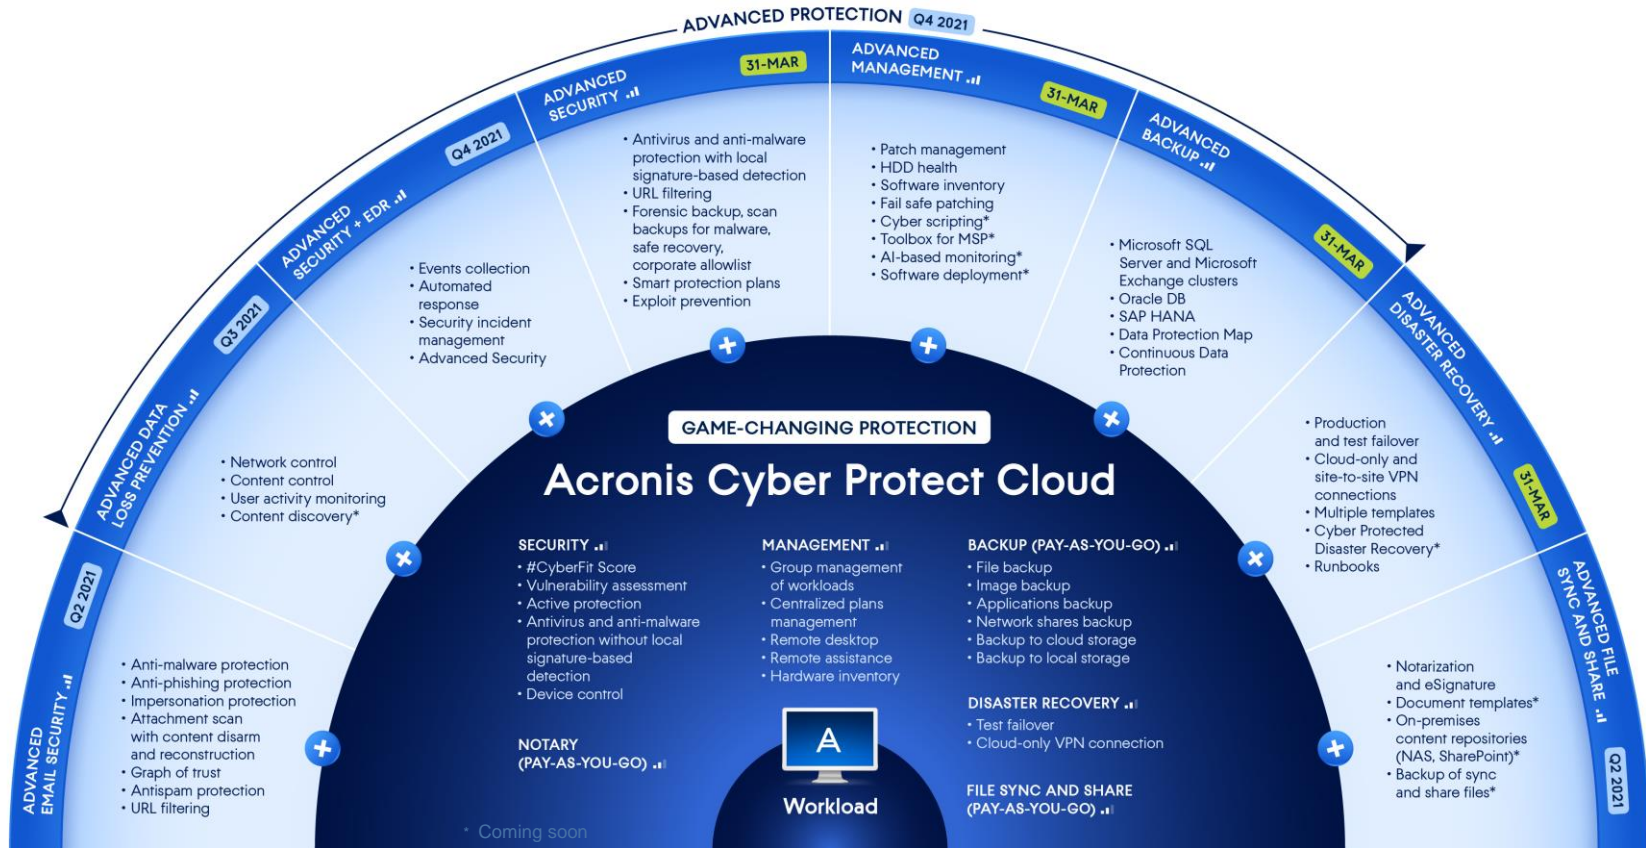

Optimize for every workload

Easy to upsell

Vendor consolidation

# 2021 Roadmap for Service Providers

## Legacy Backup & AV solutions

## Acronis Cyber Protect Cloud

### Complex

Complicated licensing, deployment, and training, as well as agent conflicts

### All services managed from one place

Remove the complexity and risks associated with non-integrated solutions

Easy

### Expensive

Multiple tools, vendors, administration costs

### Smarter use of resources

Faster operations with integration and automation lets your team focus on your clients

Efficient

### Unsecure

Lack of integration creates gaps in defenses, management burden compromises security

### Total peace of mind for clients

Customize your services and deliver complete protection for every workload

Secure

# Lower risk for your clients

## Eliminate gaps in your defenses

Deliver comprehensive cyber protection with the unique integration of data protection and cybersecurity

## Upgrade the protection of every workload

Ensure better protection for every workload with essential cyber protection

## Recover instantly without losing data

Prevent downtime with near-zero RPOs and RTOs for all users and applications

# Selling backup? Upsell to Acronis Cyber Protect

More than backup: The most secure, easy and reliable backup solution for MSPs

## Proactive Protection

- Vulnerability assessment and patch management to avoid downtime and maintenance
- Malware removal from backups
- Prevention of reoccurring infections (patch on recovery)

## Active Protection

- Continuous data protection (CDP) to avoid any data loss
- Active protection against ransomware and other malware to avoid downtime
- Self-defense for the agent and backup storage

## Reactive Protection

- Integrated disaster recovery capability
- Instant recovery: no data loss, near zero RTO & RPO
- Metadata storage for forensics and investigation of incidents

## Productivity Improvements

- Maximum number of workloads protected per an MSP technician
- Integrated remote management for quick access to the protected workloads
- Pre-configured protection plans for remote workers

# Selling security? Move to Acronis Cyber Protect

Unique capabilities deliver the most complete cyber protection solution for MSPs

## Protection

- Protection for collaboration applications – Zoom, WebEx, Microsoft teams
- AI-based hard-drive failure prediction
- Integrated, secure file sync and share solution for collaboration

## Security

- AI-based injection detection
- Entropy analysis against advanced ransomware
- Rootkit detection by scanning cold backup data
- Aggressive heuristics enabled by allowlists created from backups

## Performance

- Antivirus scans in backups, decreasing the load on protected devices
- Reduced downtime with fail-safe patch management
- Allowlisting applications by scanning backups

## Productivity benefits

- Quick assessment of a device's protection status with built-in #CyberFit score
- Data protection map to discover and protect important data
- Remote Desktop connection to office networks for end customers

# Integration enables new cyber protection capabilities

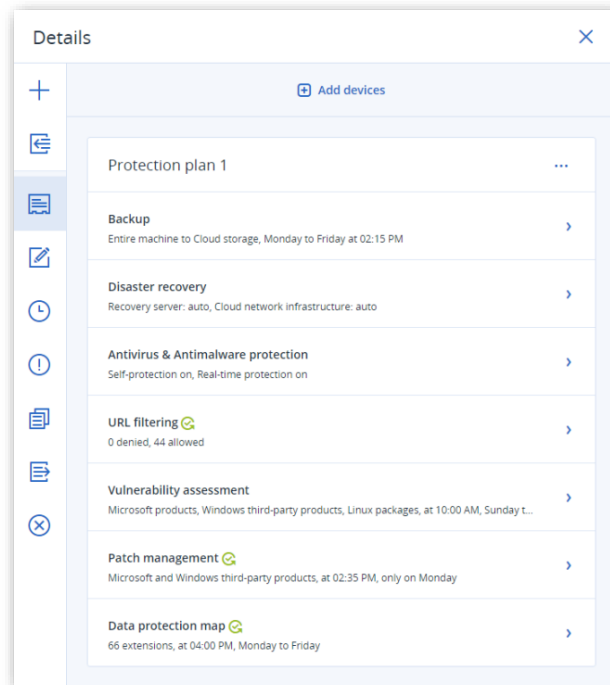

# Deep integration enables new capabilities

Integration at all levels: management, products, technology – and your business

- ✓ One agent
- ✓ One policy
- ✓ One UX/UI
- ✓ One license
- ✓ One vendor

## Harness the power of ONE:

- Eliminate complexity
- Deliver new security capabilities
- Keep costs down
- Manage all clients from one console
- Efficient support escalations with one vendor

# Innovative data protection scenarios

**Next-gen continuous data protection:** Avoid even the smallest data loss in key applications

**Safe endpoint recovery:** Integrate anti-malware updates and patches into the recovery process

**Data protection map:** Monitor the protection status of files with classification, reporting, and unstructured data analytics

**Smart protection plan:** Auto-adjust patching, scanning, and backing up based on threat alarms from Acronis Cyber Protection Operations Centers

**Forensic backup:** Image-based backups that capture additional data needed for forensic investigations

**Better protection with less resources:** Enable more aggressive scans and vulnerability assessments by offloading data to central storage, including the cloud

**Fail-safe patching:** Automatically back up endpoints before installing any patches, enabling immediate rollback

**Global and local allowlists:** Created from backups to support more aggressive heuristics, preventing false detections

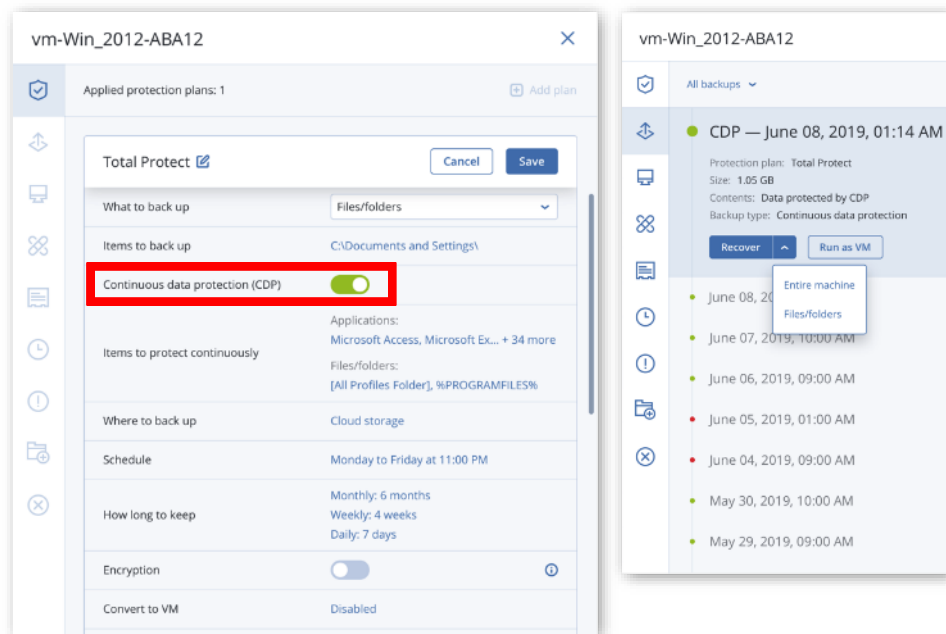

# 1. Continuous data protection

Gain safe and instant remediation without data loss and near-zero RPOs

Define the list of critical apps for every device that users are working with most often. Acronis' agent monitors every change made in the listed applications.

In case of a malware infection, you can restore the data from the last backup and apply the latest collected changes so no data is lost.

- Ensures users won't lose their work in-progress
- IT controls what is continuously backed up – Office documents, financial forms, logs, graphic files, etc.

**Why?** Protects client data – even between backups

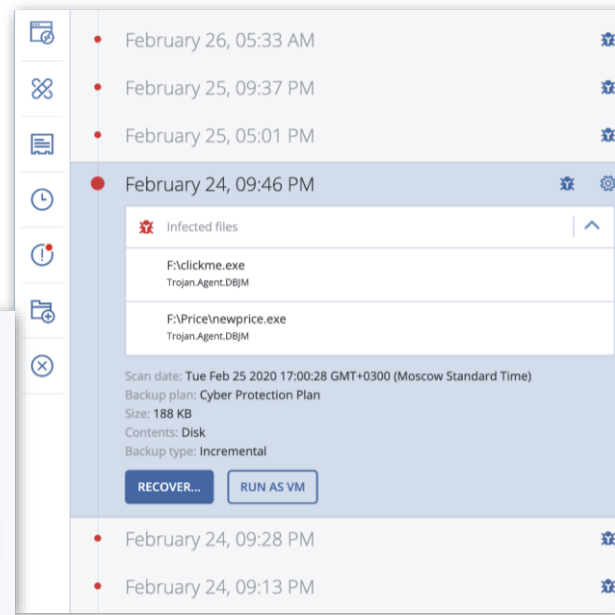

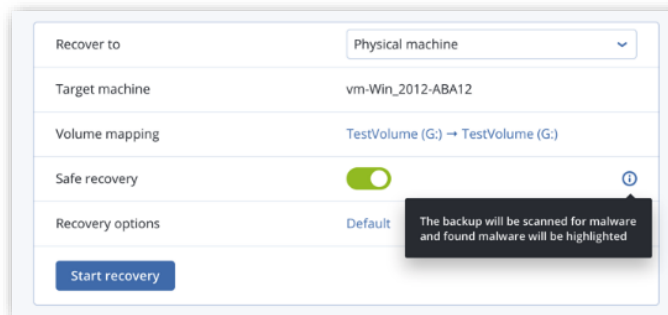

## 2. Safe recovery

### Integrate AV updates and patch management into the recovery process

The OS image or applications in the backup can include vulnerabilities that could leave users at risk.

Patching the machine and applying the latest anti-malware definitions allows users to restore the OS image with the latest patches, reducing the chance of a reoccurring infection.

- Updates the anti-malware database
- Installs the latest security patches

**Why?** Saves time, effort and data. Quickly recover using infected/vulnerable images, no extra steps

# 3. Virus and malware scans in the Acronis Cloud

## Prevent restoring infected files from backups

Scanning full disk backups at a centralized location helps find potential vulnerabilities and malware infections – ensuring users restore a malware-free backup.

- Increases potential rootkit and bootkit detections
- Restores only clean data
- Reduces loads of client endpoints

The screenshot displays the Acronis Cloud interface for backup scanning. On the left, a 'Backup scanning plans' panel shows a search bar and a table with one entry: 'New backup scanning' (checked). On the right, a 'Details' panel for 'New backup scanning' shows the following configuration:

- SCAN TYPE: Cloud storage
- BACKUPS TO SCAN: WIN-6KDATTFF188F - Entire machine to Cloud storage
- SCAN FOR: Malware
- ENCRYPTION: Off
- SCHEDULE: Automatic

Below these panels is a table listing scanned backups:

Type	Name	Status	Size	Last change
Entire machine	ABA12-WIN - Entire machine	Malware detected	200 GB	Oct 27, 2018 09:00 AM
Backup plan	ABA12-AMS - Backup plan	No malware	492 KB	Oct 26, 2018 09:00 AM
Entire machine	ABA12-AMS	No malware	1.5 GB	Oct 26, 2018 09:00 AM
Entire machine	ABA11-LIN - Entire	Not scanned	10 GB	Oct 25, 2018 06:15 AM

**Why?** Better protection with less effort and fewer resources. Offload endpoints for more aggressive scans

# 4. Smart protection plans

Use alerts from Acronis CPOCs to mitigate risks from even the latest threats

Acronis CPOCs monitor the cybersecurity landscape and release threat alerts. Acronis products automatically adjust protection plans based on these security alerts. This approach can result in more frequent backups, deeper AV scans, specific patch installs, etc. – and greater protection.

Protection plans will be restored when the situation is back to normal.

- Minimize business downtime from a malware epidemic, natural disaster, etc.
- Reduce reaction times
- Avoid data loss

The screenshot displays the 'Threat Feed' interface with a table of alerts and an open 'Remediation actions' dialog box.

Name	Severity	Type	Date
Snatch ransomware reboots PCs into Safe Mode t...	HIGH	Malware	Dec 10, 2019
Acronis discovers new Autolt; Cryptominer campai...	HIGH		
Town hit by ransomware: System shut down to ll...	MEDIUM		
Caution! Ryuk ransomware decrypter damages lar...	MEDIUM		
Warning over powerful Smominru crypto mining b...	MEDIUM		
New Malware Campaign Targets the Hospitality In...	LOW		
New Chrome Password Stealer Sends Stolen Data ...	LOW		
Beware: Windows 10 update email is a ransomwar...	LOW		
Dexphot malware uses fileless techniques to instal...	LOW		

The 'Remediation actions' dialog box includes the following sections:

- Vulnerability assessment:** Scan machines for vulnerabilities.
- Patch management:** Install patches on affected machines (toggle is ON).
- Vulnerabilities to fix:** A list of CVEs (CVE-2007-0984, CVE-2007-0993, CVE-2007-0985, CVE-2007-0284, CVE-2007-5219) with a 'Manage' icon.
- Checkboxes:** Google Chrome, Adobe Flash Player, Adobe Acrobat Reader, and Automatically accept the license agreements.
- Machines:** Linux, Debian, 8.0, esx\_win7\_x64\_bios and 39 more allowed to patch.

Buttons at the bottom: Cancel, Start remediation.

**Why?** Faster reaction times, as well as prevention of downtime and data loss

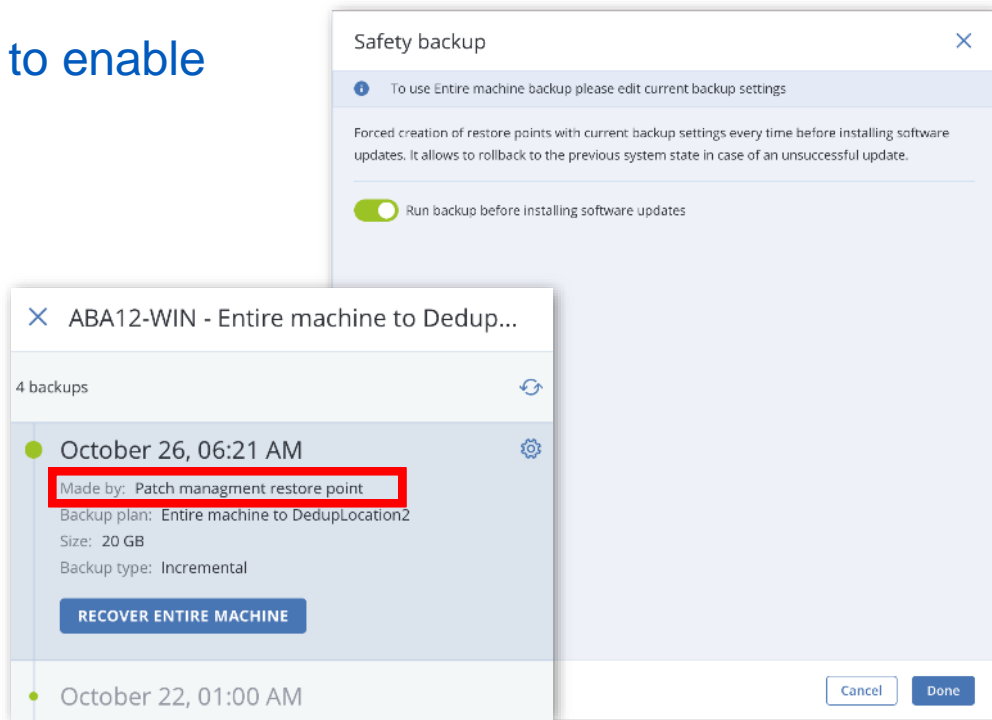

# 5. Fail-safe patching

Back up workloads before patching to enable quick rollback to a working state

A bad system patch can render a system unusable, but patch management rollbacks have limitations and can be slow.

Fail-safe patching creates an image backup of selected machines before installing a system or application patch for quick rollbacks.

- Full image backups are the fastest and easiest way to revert to a usable state

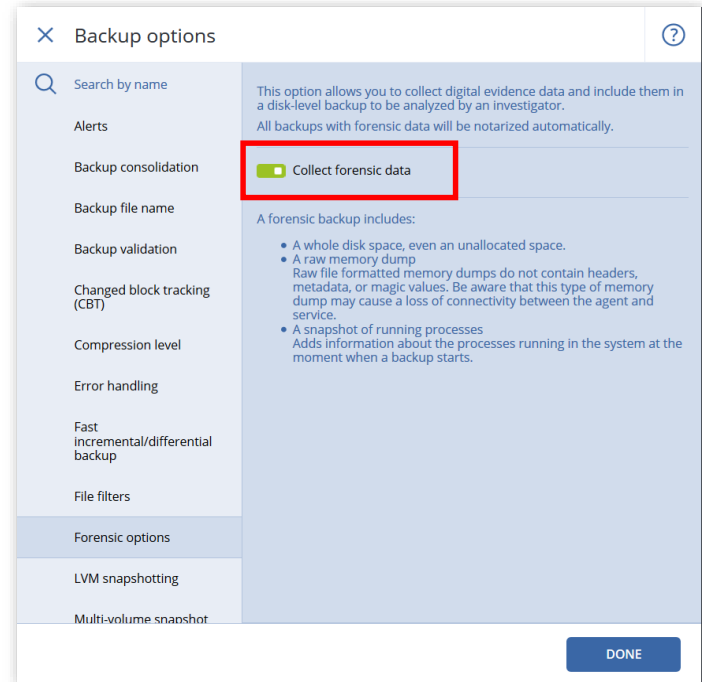

**Why?** Saves resources, while supporting faster and more reliable operations

# 6. Forensic information backup

Back up vital data as well as information needed for future analysis and investigation

By activating a special “Forensic Mode” in the product, memory dumps and full HDD images on a sector level can be collected.

- Keeps key evidence secure in the backup
- Makes future investigations easier and less costly

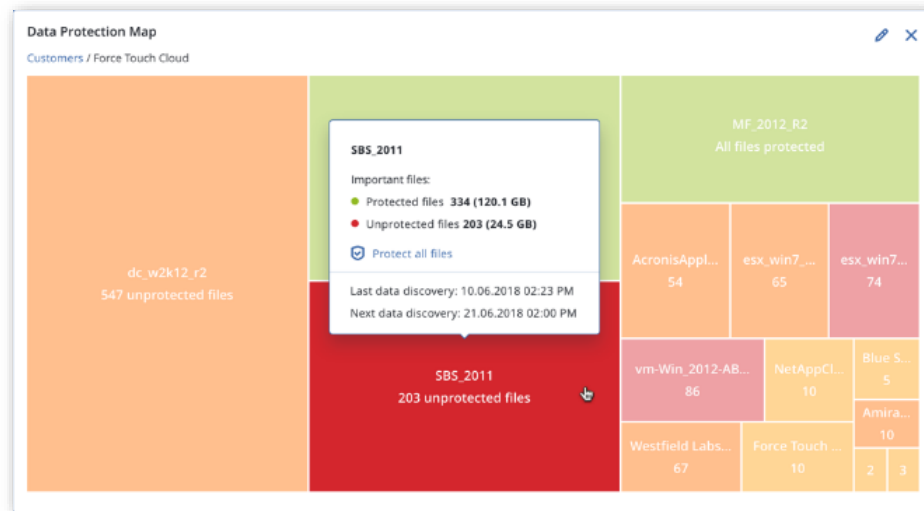

**Why?** Enables investigation and better compliance

# 7. Data compliance reporting and Data Protection Map

Use automatic data classifications to track the protection status of important files. IT will be alerted as to whether the files were backed up or not.

- Data distribution across endpoints is clearly visible
- Protection of specific files and inclusion in backup plans is easily confirmed
- Risk mitigation steps are easy to execute
- Collected data is used as the basis for compliance reports

**Why?** Complete protection that's easy, with no important data missed

# 8. Automatic allowlisting from backups

Build global and local allowlists to prevent false detections while making more aggressive, accurate heuristics

Improved detection rates may lead to more false positive alerts. Traditional, global allowlisting does not support custom applications.

Acronis Cyber Protect scans backups with anti-malware technologies (AI, behavioral heuristics, etc.) to allowlist organizationally unique apps and avoid future false positives.

- Eliminates the time-consuming process of manually allowlisting unique apps
- Improves detection rates via improved heuristics
- Supports manual allowlisting

File	Machines	Added by	Alarms prevented	Date added	
<input type="checkbox"/> 1cCustom.exe	4	System	0	28 Jun 2018 09:26 PM	...
<input type="checkbox"/> runmachinecleaner.exe	7	User	10	20 Apr 2018 10:44 AM	...
<input type="checkbox"/> PrintLetter.exe	3	System	1	19 Mar 2018 08:31 AM	...
<input type="checkbox"/> professionalsscreenrecorder.dll	7	System	0	20 Mar 2018 10:44 AM	...
<input type="checkbox"/> autoupdater.exe	12	System	0	21 Mar 2018 08:31 AM	...

**Why?** False positives can prevent access to data or apps. Automation saves time and improves protection

# Top use cases for Acronis Cyber Protect Cloud

- **Simplified onboarding.** Discover all devices that require protection and remotely install a single agent (instead of many) for anti-malware, backup, remote desktop, patch, etc.
- **Zero-day malware and ransomware protection.** Get our industry-leading, AI-based Acronis Active Protection, which now includes a static analyzer and behavioral analysis.
- **Compliance and forensic investigations.** Offer services to industries with high compliance requirements – Acronis equips you with image-based backup and forensic data like free space and memory dumps.
- **Better SLAs.** Keep and improve availability KPIs for clients with proactive, active and reactive cyber protection.
- **Post malware-attack recovery.** Lower risk of reinfection and ensure fewer operations with anti-malware scans of backups in centralized locations and safe and quick recovery – patch updates ensure backups are covered too.
- **Protection for all key files.** See what data is covered at a glance via Acronis' comprehensive Data Protection Map.
- **Centralized patching.** Protect all client software (not just Microsoft) and cover all clients using one multi-tenant tool.
- **Demonstrate your service value to clients.** Use flexible, detailed reporting to simplify contracts renewals and enable easier sales with vulnerability assessments in backup service.
- **Real-time protection of important documents.** Count on continuous data protection to immediately save all changes to critical files, even between backups.
- **Auto-response to emerging threats.** Adjust the scope and the schedule of backups or anti-malware scans, based on real-time alerts from Acronis Cyber Protection Operation Centers (CPOCs).
- **Minimal planned and unplanned downtime.** Benefit from simplified maintenance routines and proactive protection, including: hard drive health checks, on-time patches, and regular vulnerability assessments – as well as improved real-time Acronis Active Protection.

# Key features overview

# Built on the Best-in-Breed Backup for MSP

**1** Hybrid cloud architecture

**2** 20+ workload types protected

**3** File & Image Backup

**4** Instant recovery

**5** Flexible Storage

**6** Built for MSP

---

**Why?** Faster recovery and better RTOs

# Full-image and file-level backups

## Back up individual files or safeguard an entire business with a few clicks

- **File-level backup:** Use this option to protect specific data, reduce the backup size, and save storage space
- **Full-image backup:** Easily back up the entire system as a single file, ensuring bare metal restores
- In the event of data disaster, you can easily restore all information to new hardware

Streamline delivery of cyber protection using just one solution

# Best-In-Industry RTOs with Acronis Instant Restore

Acronis Instant Restore is patented technology that allows you to recover systems in seconds by starting any Windows or Linux system (physical or virtual) directly from the backup storage on your existing Microsoft Hyper-V or VMware vSphere ESXi host – without moving data.

## How it works

## Benefits

- RTO in seconds
- Recover any virtual, physical or cloud server, Windows or Linux
- Reduced network consumption

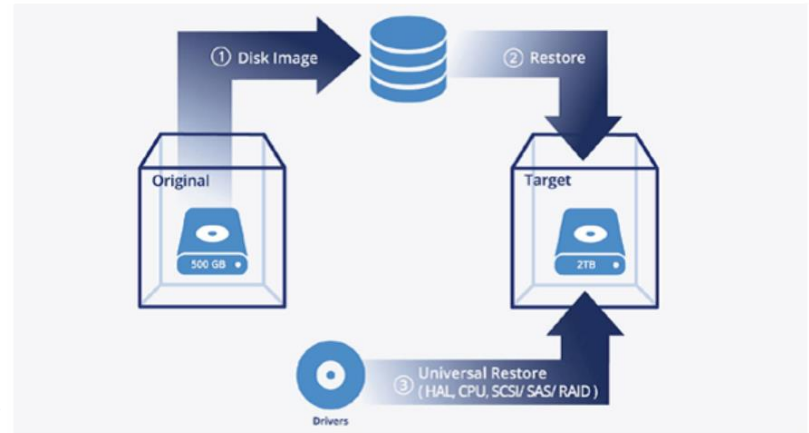

# Acronis Universal Restore

## Restore Windows and Linux systems to dissimilar hardware

- Quick and easy system recovery to dissimilar hardware, including bare-metal physical, virtual, or cloud environments
- After recovering a disk-image as-is, Acronis Universal Restore analyzes the new hardware platform and tunes the Windows or Linux settings to match the new requirements

## Why?

- Ensure quick, easy system migration with a few clicks
- Reduce RTOs
- Minimize expensive downtime

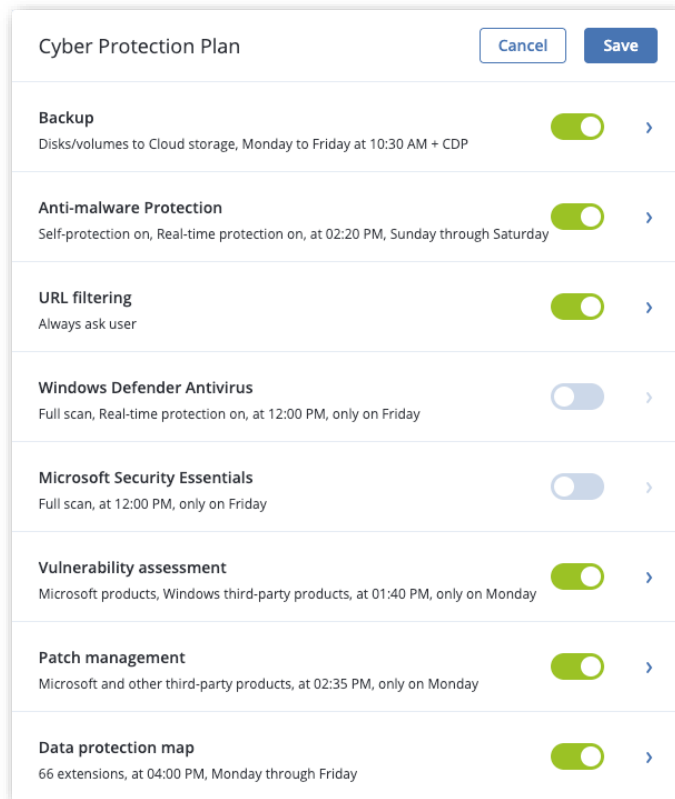

**Backup is dead – Acronis  
Cyber Protect is better  
~~backup~~ protection**

# One Protection Plan

Efficiently enable, disable and configure services and policies on a per-client or group level:

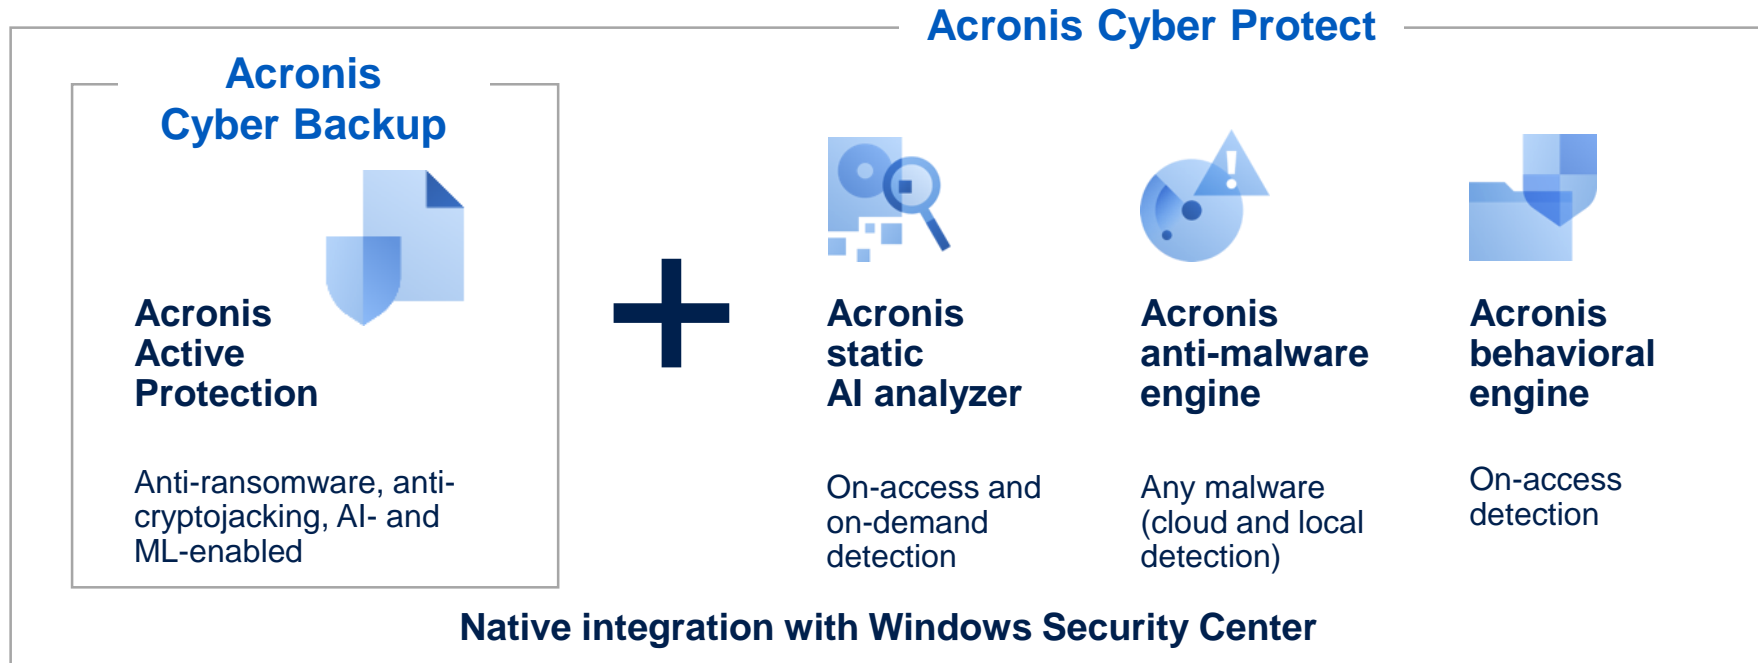

- Backup
- Anti-malware protection
- Disaster Recovery
- URL filtering
- Vulnerability assessments
- Patch management
- Data discovery (via data protection map)
- Microsoft Defender Antivirus and Microsoft Security Essentials management

**Why?** Better protection with less effort, automated

# Significantly extended anti-malware capabilities

**Why?** Active prevention of downtime and data loss, not just recovery after an attack

# AI-based protection against zero-day malware

## Anti-malware protection for Windows, Linux and macOS

- Ransomware detection and data recovery
- Cryptomining process detection
- Real-time protection and on-demand scanning
- Self-protection: Protect Acronis components (e.g. registry, service stopping, Acronis file protecting)
- Network folder protection: Protect the data in shared folders on your machine against ransomware
- Server-side protection: Protect the data in shared folders within your network against ransomware
- Files quarantine
- Exclusions management: Specify processes that will not be considered malware; exclude folders where file changes will not be monitored; select files and folders where scheduled scanning will not be executed

The image displays two screenshots from the Acronis Cyber Protect user interface. The left screenshot shows a 'Quarantined files' window with a search bar and a list of files. The right screenshot shows a 'Protection plan' configuration window with various security settings.

**Quarantined files**

# Devices auto-discovery and remote agent installation

Simplify the process of installing multiple agents at once – both in the cloud and on-premises

- Network-based discovery
- Active Directory-based discovery
- Import a list of computers from the file
- Auto-apply a protection plan
- Batch remote agent installations with a discovery wizard

**Why?** Easier and faster onboarding. Fewer resources required. Completeness of protection.

# Vulnerability assessments

## Discover an issue before it's a problem

- Continuous, daily updates of Acronis' vulnerability and patch management database
- Comprehensive dashboard for vulnerability detection, their severity and patch availability
- **Constantly expanding support for:**
  - Microsoft stack:
    - a) Workstations – Windows 7 and later
    - b) Server – Windows Server 2008R2 and later
    - c) Microsoft Office (2010 and more) and related components
    - d) .NET Framework and server applications
  - Adobe, Oracle Java
  - Collaboration software: Zoom, Teams, VPNs
  - Browsers and other software

The screenshot displays the 'Vulnerabilities' dashboard with a table of CVEs and a 'What to scan' dialog box. The table lists CVEs with their affected products, the number of machines affected, their severity, and the number of available patches. The 'What to scan' dialog box allows users to select items to scan for vulnerabilities, including Microsoft products, other third-party products, Linux machines, and supported products.

Name	Affected products	Machines	Severity	Patches
<input checked="" type="checkbox"/> CVE-2018-209654	Chrome, Firefox	12	CRITICAL	—
<input checked="" type="checkbox"/> CVE-2018-1000016	Office 2010	3	HIGH	2
<input type="checkbox"/> CVE-2018-1003	Acrobat Reader	3	HIGH	2
<input type="checkbox"/> CVE-2018-100047	Flash Player for Chrome	—	—	—
<input checked="" type="checkbox"/> CVE-2018-3223	Windows Server 2008 R2	—	—	—
<input type="checkbox"/> CVE-2018-9800	Office 365 Client	—	—	—
<input checked="" type="checkbox"/> CVE-2018-337894	Firefox	—	—	—

**What to scan**

Select the items that you want to scan for vulnerabilities.

Windows machines:

- Microsoft products
- Other third-party products

Linux machines:

- Scan linux packages

Supported products

Reset to default

Cancel Done

**Why?** Mitigates potential threats and prevents attacks

# Drive health monitoring

## Know about a disk issue before an issue happens

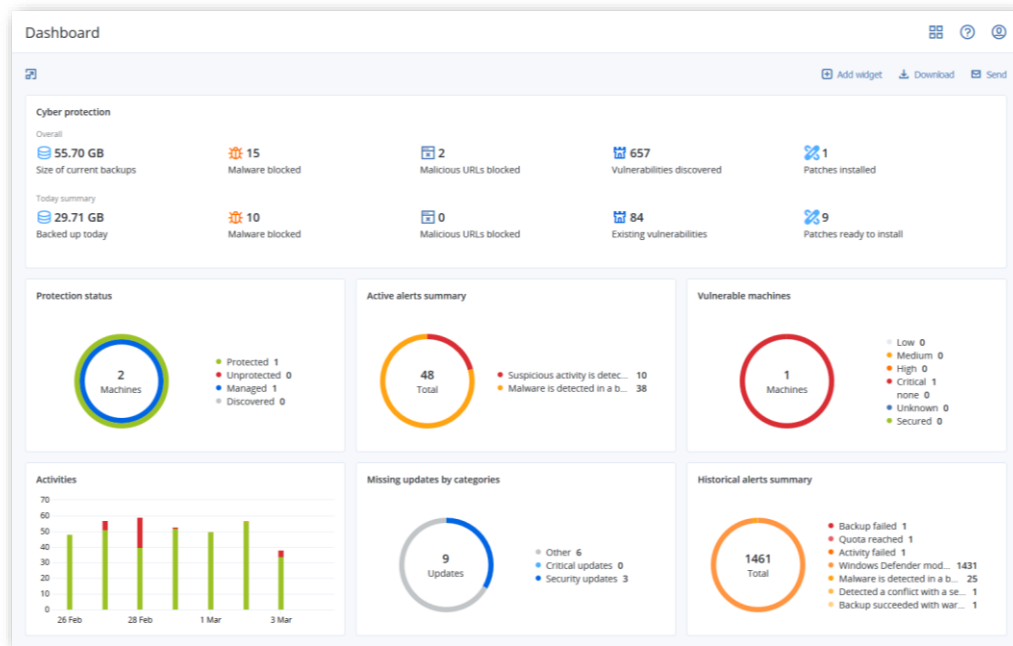

- Uses a combination of machine learning, S.M.A.R.T. reports, drive size, drive vendor, etc. to predict HDD/SSD failures
- The machine-learning model currently delivers 98.5% accuracy in its predictions – and we keep improving it
- Once a drive alert is raised, you can take action (backing up critical files from the failing drive, for example)

**Why?** Avoid unpredictable customer data loss, proactively improve uptime, differentiate yourself

# Flexible monitoring and reporting

- Hardware health monitoring (HDD, SSD)
- Security update statuses visibility
- Quickly identify problems
- Fast access to management actions
- Customizable dashboard widgets

**Why?** Single pane of glass, faster operations, helps demonstrate MSP value and simplify renewals

# Hardware inventory collection

- Discover all hardware assets on all protected endpoints of the organization (e.g. CPU, GPU, motherboard, RAM, network adapters, etc.)
- Get up-to-date information about hardware assets:
  - Regular scans can be scheduled to run automatically
  - On-demand scans can be manually triggered by engineers
- Get detailed hardware information about hardware assets such as model, manufacturer, serial number, etc.
- Browse all hardware assets, or search and filter by multiple criteria: processor model, processor cores, disk total size, memory capacity
- Generate hardware inventory reports

The screenshot displays the Acronis software interface for hardware inventory collection. On the left, a list titled 'All devices' shows various endpoints, including VMs and physical devices. The 'DESKTOP-GLN477D' device is selected. The right pane shows the 'HARDWARE' tab for this device, displaying details for the Motherboard and Processors. The Motherboard section shows a Z170X model from Gigabyte Technology Co. Ltd. with serial number 132-LF-E657. The Processors section shows an Intel(R) Core(TM) i5-9600K CPU with 4 cores and 8 logical processors. A 'Scan now' button is visible in the top right of the hardware details pane.

Type	Name

Number of cores	4 Cores, 8 Logical Processors

**Why?** Save time and effort with up-to-date hardware inventory information

# Remote Desktop & Remote Assistance

## Remotely operate any endpoint as if you are near the device

- Securely connect to remote machines even behind a firewall on a private network without changing firewall settings or establishing additional VPN tunnels
- Allow your engineers to view a user's screen, to provide support with specific tasks or fix issues

The screenshot displays the Acronis Cyber Protect console interface. At the top, it says "All devices" with a "+ Add" button and several utility icons. Below is a search bar and a table of devices. The table has columns for Type, Name, Account, Status, Last backup, Next backup, and Agent. Two devices are listed: "DESKTOP-HHNKBMQ" and "Win81". The first device has a status of "Suspicious activity ..." and the second has "Malware is detecte...". A context menu is open on the right side of the table, showing options: "Protect", "Recovery", "Connect via RDP client", and "Connect via HTML5 client". The "Connect via RDP client" and "Connect via HTML5 client" options are highlighted with a red border.

Type	Name	Account	Status	Last backup	Next backup	Agent
VM	DESKTOP-HHNKBMQ	GreenTorch	<span style="color: red;">✘ Suspicious activity ...</span>	Dec 30 06:11:28 PM	Dec 31 12:51:15 PM	DESKTOP-HHNK...
VM	Win81	GreenTorch	<span style="color: orange;">⚠ Malware is detecte...</span>	Nov 11 10:40:20 PM	Not scheduled	Win81

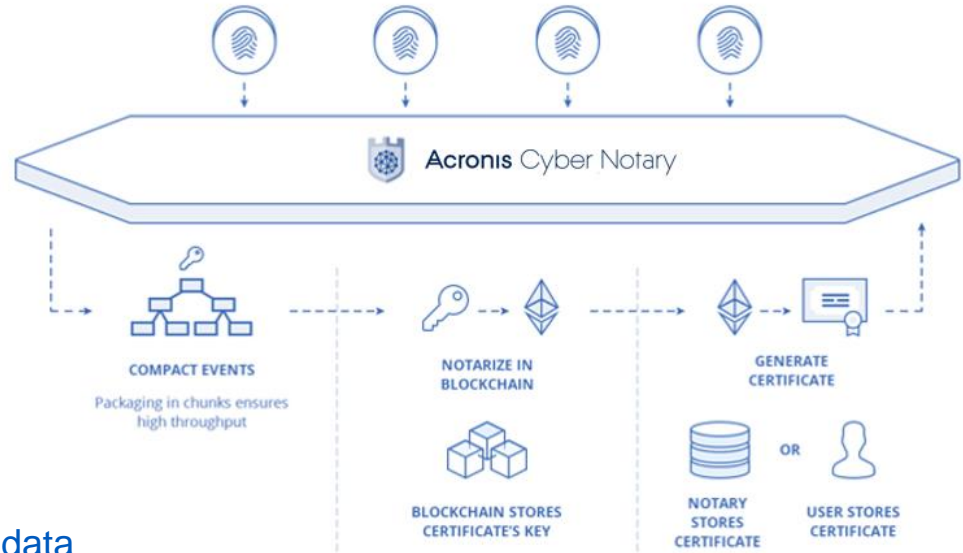

**Why?** Fewer tools, plus less effort to connect, and faster reaction times, reduced costs

# Blockchain notarization

## Ensure data integrity with innovative blockchain-based Acronis Cyber Notary

- Highly scalable micro-service architecture
- API interface (REST), queue interface (AMQP) for integration
- High throughput (xx10,000 objects per blockchain transaction)
- Notarization certificates with built-in verification

## Why?

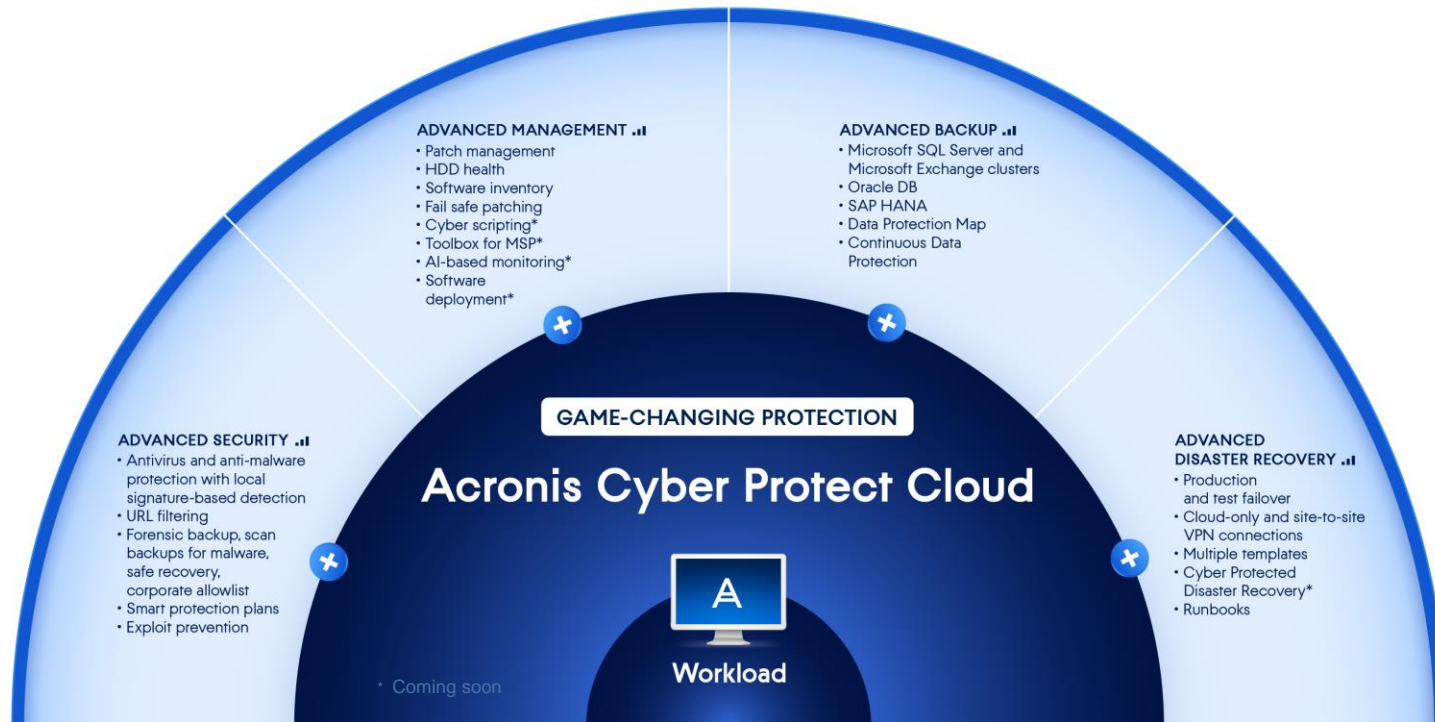

- Ensure the integrity of business critical data
- Achieve greater regulatory transparency
- Reduce security risks

Acronis

#CyberFit

**Easy, Efficient, Secure  
cyber protection with  
Advanced Packs**

# Advanced Packs: Security, Management, Backup, Disaster Recovery

# Acronis Cyber Protect Cloud with Advanced Backup

Protect your clients' data confidently with best-in-breed backup  
enhanced with cyber protection

## Increase automation and productivity

Scheduled backup reports, paired with cloud backup enhancements – like continuous data protection – helps you save time while saving your clients from data loss

## Deliver the most secure backup

Acronis delivers a unique approach by combining cloud backup with cyber protection features, such as antimalware and antivirus – helping you keep clients' data secure

## Protect more workloads on more platforms

From a single console, protect more than 20 workload types, including Microsoft Exchange, Microsoft SQL Server, Oracle DBMS Real Application clusters, and SAP HANA

# Acronis Cyber Protect Cloud with Advanced Disaster Recovery

Improve security by detecting more threats, save on simplified security management, and deliver better remediation with integrated cyber protection

## Less downtime

Get clients running in mere minutes by spinning up IT systems in the Acronis cloud with full site-to-site connectivity and the ability to recover them to similar or dissimilar hardware

## Minimize complexity

No need to add, learn, or manage another platform. It's one solution for any workload managed from a single interface that enables you to build a complete cyber protection service

## Grow recurring revenue

Deliver more value, deepen client relationships, and increase retention by offering clients the disaster recovery services they are looking for – while increasing your monthly recurring revenue

# Acronis Cyber Protect Cloud with Advanced Security

Improve security by detecting more threats, save on simplified security management, and deliver better remediation with integrated cyber protection

## Full-stack antimalware

Acronis Active Protection, enhanced with exploit prevention, URL filtering, antimalware detection for backed-up data, and improved detection rate to catch more threats faster

## Security automation

Smart protection plans, auto-allowlist custom apps, automatic malware scans and AV definitions updates as part of recovery process to deliver services more effortlessly

## Efficient forensics

Collect digital evidence and save it in a secure central repository to enable thorough post-incident investigations and proper remediation, while keeping costs down.

# Acronis Cyber Protect Cloud with Advanced Management

Improve clients' protection by keeping systems up-to-date  
while decreasing the management burden and TCO

## Advanced patch management

Keep systems up-to-date and proactively mitigate vulnerabilities.

## Patch management automation

Save time and effort with patch management automation and fail-safe patching technology

## Comprehensive management tools

Streamline your planning with software inventory collection, report scheduling, and drive health monitoring.

# Acronis Cyber Protect Cloud

## Features by Advanced Packs

### Advanced Backup:

- ✓ Continuous data protection
- ✓ Backup support for Microsoft SQL Server Clusters, Microsoft Exchange Clusters, Oracle DB, SAP HANA
- ✓ Data protection map and compliance reporting
- ✓ Scheduled backup reports

### Advanced Disaster Recovery:

- ✓ Production and test failover to Acronis Cloud
- ✓ Runbooks: disaster recovery orchestration
- ✓ VPN-less deployment option
- ✓ IPsec Multisite VPN support, L2 site-to-site open VPN
- ✓ Multiple templates
- ✓ Custom DNS configuration

### Advanced Security:

- ✓ URL filtering
- ✓ Exploit prevention
- ✓ Enhanced signature-based detection
- ✓ Anti-malware scans of data in the Acronis Cloud
- ✓ Forensics data in backups
- ✓ Smart protect plans
- ✓ Automatic allowlisting
- ✓ Safe recovery
- ✓ Remote device wipe
- ✓ Windows anti-malware management

### Advanced Management:

- ✓ Automated patch management
- ✓ Software inventory collection
- ✓ Drive health monitor
- ✓ Fail-safe patching
- ✓ Report scheduling

# Why Acronis Cyber Protect Cloud?

# Benefits of Acronis Cyber Protection

Fastest return to productivity: autonomous, integrated and modular cyber protection

## Ease of Use

Fewer human errors, faster deployment, more workloads supported by an IT professional, more customers protected

## Low TCO

Protection accessible for customer of any size, and low cost means higher margins for partners

## Security

Protection solutions natively designed for security decrease partner risk of liability

## Control

Control over data location, protection configuration and rights delegation reduced partner risks

## Reliability

Scalable and highly available cyber protection allows partners to offer higher SLAs to their customers

# Innovative Cyber Protection

1

## All-in-one security solution

An integrated combination of the most useful protections: anti-malware, vulnerability assessment, backup, patch management

2

## Multilayered approach

Total control of data lifecycle on protected systems: proactively avoid incidents, active protection and reactive stage

3

## Excellent performance

A single agent sharing low-level interceptions for both backup and anti-malware protection

4

## Best tech in the industry

Proven expertise in anti-malware protection, backup, and AI/ML

5

## Simple tool against sophisticated threats

Single pane of glass, unified reporting, touch-friendly UI, one protection plan

# Benefits for service providers

Protect a client's infrastructure and data beyond backup

## Increase ARPU

- Sell more cyber protection services
- Get more margin on in-demand services
- Improve attach rate and sell more

## Improve SLAs

- Proactively avoid downtime
- Faster remediation with improved workload protection
- Win more clients with better SLAs

## Control Costs

- Reduce expenses by using one tool for all daily tasks:
  - Onboarding
  - Monitoring
  - Management
  - Assistance
- No new HW/staff required
- Improved granular licensing

## Decrease Churn

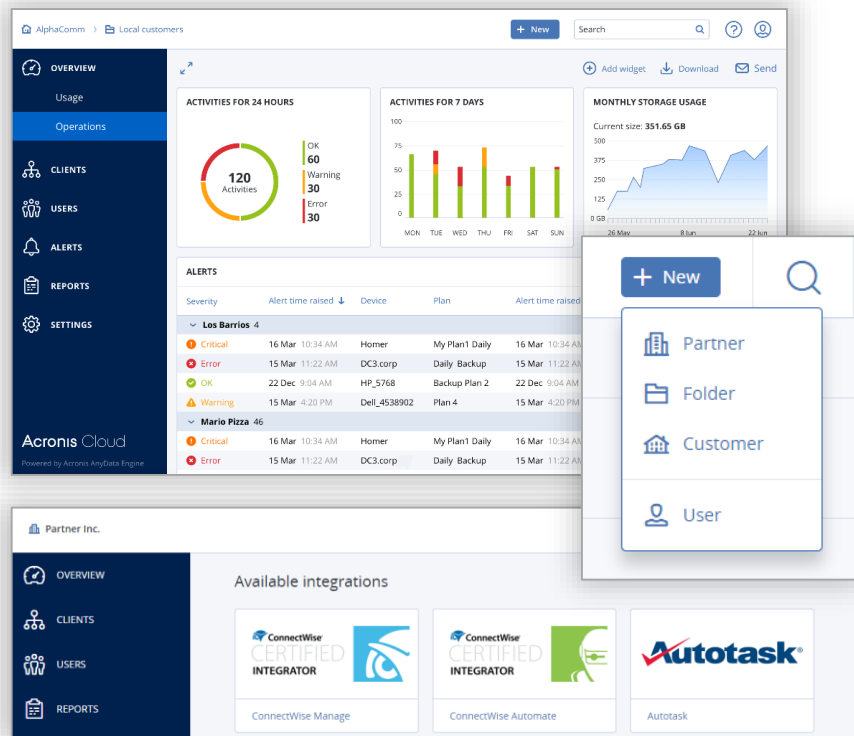

- Improve customer satisfaction and keep them coming back for more
- Demonstrate value and simplify renewals
- More services – mean stickier clients

## Offer Managed Security

- Easy additional revenue:
  - No investment
  - No risk
  - No hunting for expensive security specialists
- Better protection for clients

# Built for Service Providers

Easy, scalable management of customers' accounts via an easy-to-use web console

Integration with Autotask, ConnectWise Automate, and ConnectWise Manage

Integration with custom provisioning systems via RESTful management API

Comprehensive white-labelling

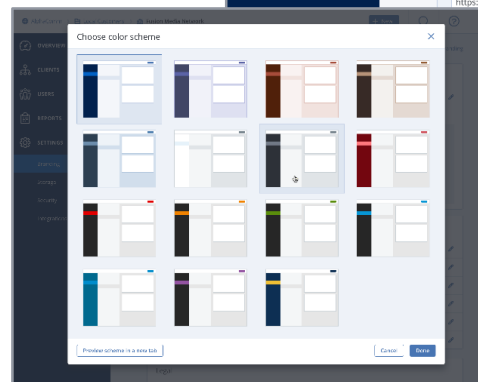

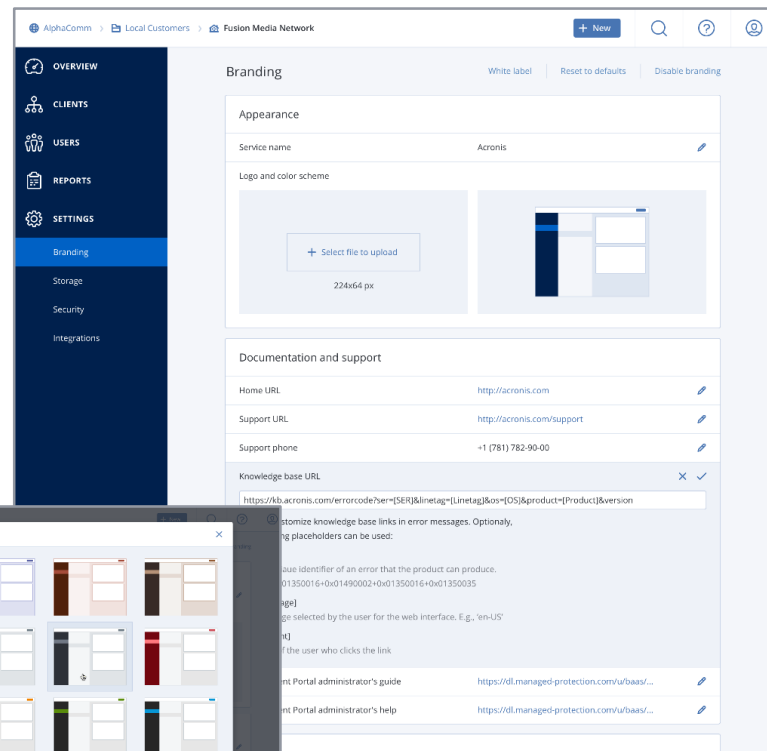

Straightforward pay-as-you-go pricing

# White-Label the Service to Maintain Your Brand's Unique Look and Feel

Design the management portal's user interface and your backup and disaster recovery services as desired. You can remove any association with Acronis or higher-level partners. Nearly 20 branding items offer key flexibility, such as:

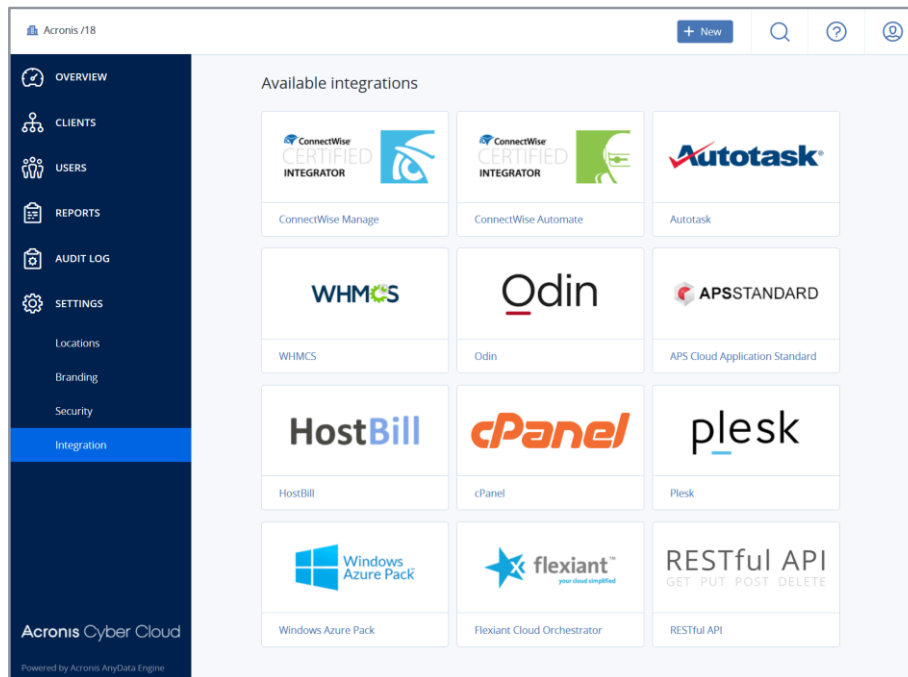

- Web-console color scheme
- Logos
- Company and service names
- Customizable email settings

# Integration with Service Provider Tools

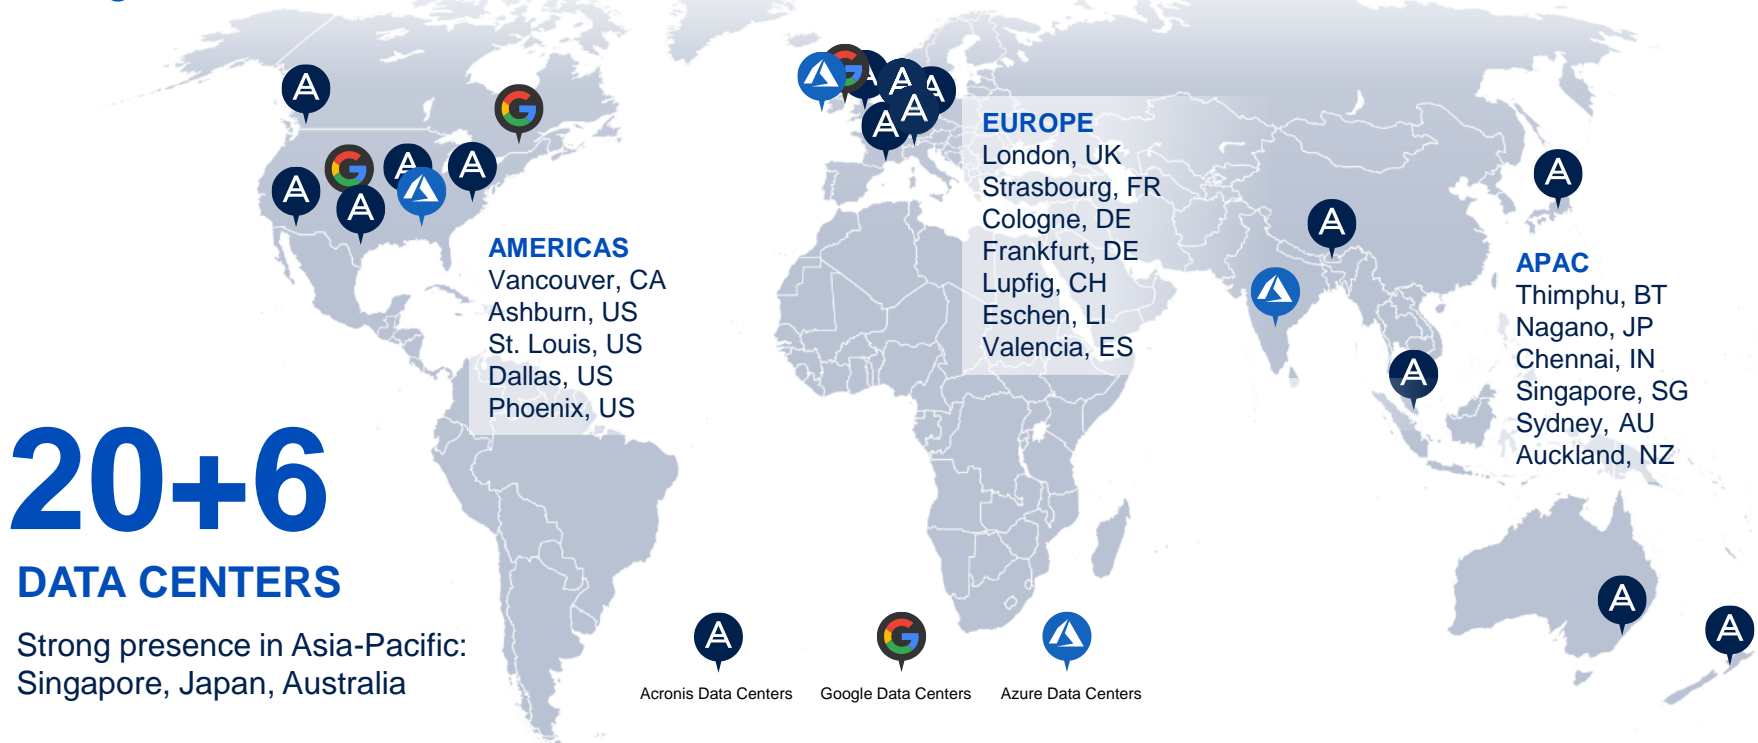

**Need a solution that seamlessly integrates with your business automation systems?**

- **Configure integrations** with a variety of third-party systems, including:
  - **RMM and PSA tools:** Autotask, ConnectWise (Automate, Manage, Control), Kaseya
  - **Hosting control panels and billing systems:** cPanel, Plesk, WHMCS, HostBill
  - **Marketplace providers:** CloudBlue, AppDirect
- Utilize a powerful **RESTful management API** for custom integrations

# Ensure Compliance and a Local Presence

Choose from 26 data centers worldwide to store data – Acronis-hosted, Google Cloud and Microsoft Azure

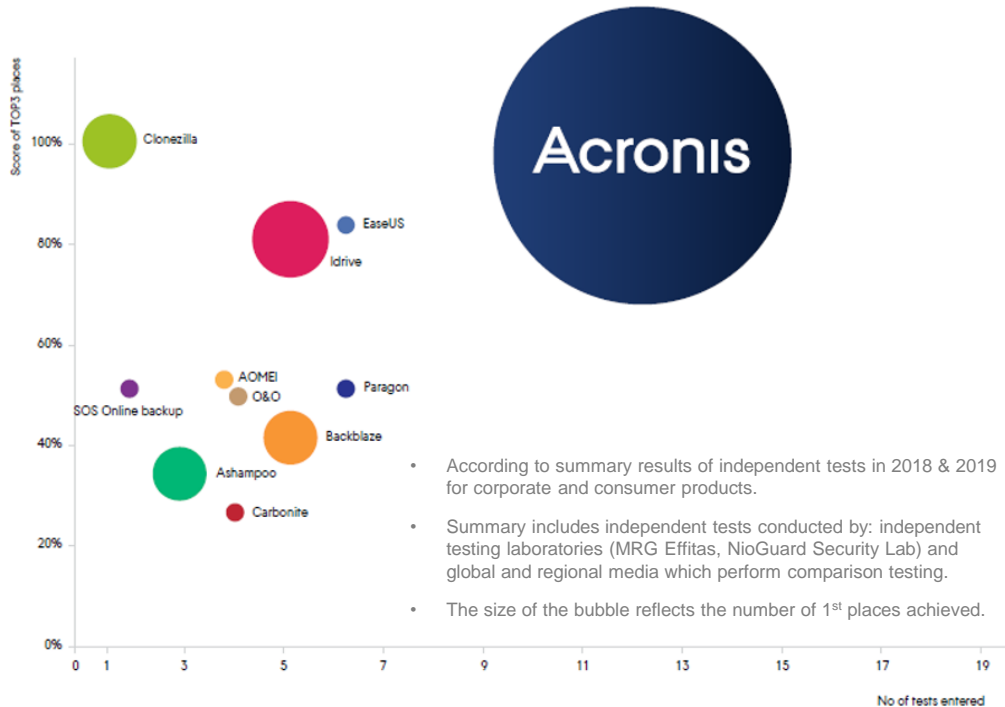

**20+6**  
**DATA CENTERS**

Strong presence in Asia-Pacific:  
Singapore, Japan, Australia

# Leader in independent tests results

# Acronis security industry recognition

MVI member

VIRUSTOTAL member

Cloud Security Alliance member

Anti-Malware Testing Standard Organization member

Anti-Phishing Working Group member

MRG-Effitas participant and test winner

Anti-Malware Test Lab participant and test winner

ICSA Labs certified

NioGuard Security Lab participant and test winner

AV-Comparatives approved business security product

Passed  
VIRUS 100  
VB100 certified

AV-Test participant and test winner

# Acronis security related certifications

## FIPS 140-2

Acronis AnyData Cryptographic Library has been [successfully verified by NIST](#)

## ISO 27001

Acronis has Information Security Management System in accordance with standard ISO 27001:2013.

## GDPR

Acronis is GDPR compliant through self-assessment as of May 25, 2018.

## ISO 9001

Compliant with ISO 9001:2015

## GLBA (Gramm-Leach-Bliley Act)

GLBA is applicable to financial institutions, compliant to Title V, Subtitle A, Section 501.(b)

## TAA

Acronis products are "TAA compliant" as manufactured or "substantially transformed" in Switzerland

## HIPAA

An independent third party gap analysis, showing that Acronis is compliant with HIPAA rules

## Privacy Shield

Acronis is EU-US and Swiss-US Privacy Shield certified

# Acronis Cyber Protect Cloud Partners

## Union Tech Coop

Union Technology Cooperative (UTC) is a worker-owned managed service provider based in Middleton, Wisconsin that provides technology solutions to organizations.

## Zebra Systems

Zebra Systems is a cloud distributor in the Czech Republic focused on backup, disaster recovery, and security products.

## Vmotion IT

VMotion IT Solutions is focused on providing web hosting and cloud solutions through data center facilities located in Ireland.

# Acronis Cyber Protect Cloud Partners

## Technopeak

TechnoPeak is a fast-growing systems integrator providing business automation, technology services, and digital transformation solutions. The company operates in Europe, CIS, and the Middle East, and it has over 500 IT professionals supporting over 3,000 customers.

## DataTegra

DataTegra delivers managed security services to commercial and public sector clients in South Africa and across Africa. The company has been operating for over a decade and provides a wide range of security services.

## i3-Software & Services

i3-Software & Services LLC (S&S) is a managed service provider based in Louisiana that specializes in supporting local government. The company develops and sells IT solutions into municipal, parish/county, and state agencies.

# MSPs on Acronis Cyber Protect Cloud

*One of the biggest values in Acronis Cyber Protect is the integration and getting customers to actually back up their data.*

*Our goal (with Acronis Cyber Protect) is to drive as much penetration into our existing customers and then start to prospect for new customers.*

*There is just **a lot of really smart stuff in the product**. It is really smart to come at it from the data protection angle because you are thinking of things that other vendors wouldn't consider. There is just a ton of opportunity with the product, and we are really excited about all of it.*

*In addition to Symantec, we are also using Cisco Umbrella for DNS filtering and Panorama 9 for remote monitoring and patch management. Of course we use Acronis for backup. It would be great if we could **combine separate security solutions into just one** thing which is the direction you guys are going. It's a great vision in terms of where things are going and leveraging one tool to do a lot of things.*

*There is just a huge opportunity to say this **product works great**, it is really easy to use. We will come out to your site, train you – we know you are going to love it because we do.*

# Licensing and Pricing

# Overview of Licensing Changes for Existing Partners

1. **Acronis Cyber Protect Cloud** includes all features of **Acronis Cyber Backup Cloud Standard** extended with essential cyber protection functionality
2. **PAYG Acronis Cyber Protect Cloud functionality:**
  - Backup, Disaster Recovery (test failover), File Sync & Share, Notarization
3. **Free Acronis Cyber Protect Cloud functionality:**
  - Security
  - Management
4. **Acronis Cyber Backup Cloud** discontinued (completely incorporated into Acronis Cyber Protect Cloud or Advanced Backup pack), **Acronis Cyber Disaster Recovery** discontinued, functionality split between Acronis Cyber Protect Cloud and Advanced Disaster Recovery Pack
5. **Advanced packs instead of editions:**
  - Different advanced packs can be added to different workloads on a customer level
  - All advanced packs will be applicable to both per-GB and per-workload licensing models
6. **Pricing changes**
  - Cyber protection functionality will be available in per-GB licensing model

# A simplified approach

	Acronis Cyber Cloud C20.08	Acronis Cyber Cloud C21.03
Licensing model (per GB/per workload)	Customer level	Customer level
Product/editions	<b>Two editions:</b> <ul style="list-style-type: none"> <li>• <b>Acronis Cyber Backup</b> (per-GB) – backup only</li> <li>• <b>Acronis Cyber Protect</b> (per-workload) – four editions</li> </ul>	<b>Single product – Acronis Cyber Protect Cloud</b> <ul style="list-style-type: none"> <li>• No editions</li> </ul>
Additional functionality	Higher edition (per-workload model only)	Advanced packs
Number of SKUs	43	38
FREE cyber protection functionality	No	Yes
Free cloud storage	Yes (Acronis Cyber Protect Cloud only)	Yes (MS365 and Google workspace)

# Acronis Cyber Protect Cloud: Cyber Protection for Every Workload at no Cost

Protect your clients' workloads with essential cyber protection functionalities and pay nothing

Features		Acronis Cyber Protect Cloud
<b>Security</b>	#CyberFit Score	Included
	Weak passwords check	Included
	Vulnerability assessment	Included
	Anti-Ransomware protection: Acronis Active Protection	Included
	Antivirus and Antimalware protection: Exploit prevention	Included
	Antivirus and Antimalware protection: Cloud signature-based file detection (no local signature-based detection)	Included
	Antivirus and Antimalware protection: Pre-Execution AI based file analyzer, Behavior based Cyber Engine	Included
<b>Cyber Protection Management</b>	Group management of devices	Included
	Centralized plans management	Included
	Dashboards and reports	Included
	Remote desktop and remote assistance	Included
	Hardware inventory	Included
<b>Data Loss Prevention</b>	Device control	Included

# Acronis Cyber Protect Cloud: Pay-as-you-go Features

Ensure further protection of your clients' workloads with Acronis Cyber Protect Cloud pay-as-you-go features. Choose a licensing model and apply it on a client level. Both per-GB and per-workload are available.

Features		Acronis Cyber Protect Cloud
Backup	Workstations, Servers (Windows, Linux, Mac) backup	PAYG
	Virtual machine backup	PAYG
	File backup	PAYG
	Image backup	PAYG
	Standard applications backup (Microsoft 365, Google Workspace, Microsoft Exchange, Microsoft SQL)	PAYG
	Network shares backup	PAYG
	Backup to local storage	PAYG
	Backup to cloud storage	PAYG
Disaster Recovery	Test failover in isolated network environment	4h / month
	Cloud-only VPN Connection	PAYG
File Sync & Share	File Sync & Share functionality	PAYG (Q2)
Notary	Notarization and e-signature	PAYG

# Two Licensing Models

## Per-GB model

The per-GB model is simple – you only pay for the backup storage used.

## Per-workload model

The per-workload model requires you to pay for each protected workload (there are different prices for different types of workloads) as well as for cloud storage.

# Advanced Packs: Feature split

Advanced Packs	Features	
Advanced Security	Anti-virus and Anti-malware protection: Local signature-based file detection	Included
	URL filtering	Included
	Forensic backup, scan backups for malware, safe recovery, corporate whitelist	Included
	Smart protection plans (integration with CPOC alerts)	Included
Advanced Backup	Microsoft SQL Server and Microsoft Exchange clusters	Included
	Oracle DB	Included
	SAP HANA	Included
	Continuous Data Protection backup	Included
	Data Protection Map	Included
Advanced Management	Patch management	Included
	HDD health	Included
	Software inventory	Included
	Fail safe patching	Included
	Cyber scripting*	Included
	Toolbox for MSP: Processes/Services, Remote task manager*	Included
	AI-based monitoring*	Included
	Software deployment*	Included
Advanced Disaster Recovery	Runbooks	Included
	Production and test failover	Included
	Cloud only and site-to-site VPN Connection	Included
	Multiple templates	Included
	Cyber Protected Disaster Recovery (DR site automatic launch in the event of a cyberattack)*	Included
Advanced File Sync and Share (Q2)	Notarization and e-signature	Included
	Document templates*	Included
	On-premises content repositories (NAS, SharePoint)*	Included
	Backup of sync and share files*	Included
Advanced Email Security (Q2)	Anti-malware and anti-phishing protection, impersonation protection, attachments scan, content disarm and reconstruction, graph of trust	Included (Q2)
Advanced Data Loss Prevention (Q3)	Network control	Included (Q3)
	User activity monitoring	Included (Q3)
	Content control	Included (Q3)
	Content discovery*	Included (Q3)
Advanced Security + EDR (Q4)	All Advanced Security features + Endpoint Detection and Response (events collection, automated response, security incident management)	Included (Q4)
Advanced Automation (Q4)	Sales and billing automation	Included (Q4)
	Service desk and time tracking	Included (Q4)
	CRM with leads and opportunities management	Included (Q4)
	Integrations with accounting and payment systems	Included (Q4)
Advanced Protection (Q4)	All Advanced Security, Advanced Backup, Advanced Management, Advanced Security + EDR, and Advanced Data Loss Prevention	Included (Q4)

**Note:** All features marked with asterisk (\*) will be available at a later date

# Advanced Packs: Administration

Partners can leverage **all advanced packs** within the Acronis Cyber Cloud management console

Clients' workloads can be protected by **one, multiple, or all advanced packs** in both per-GB and per-workload licensing models

You can easily **enable or disable an advanced pack** via the Acronis Cyber Cloud management console

# New vs. Old SKUs: Per-GB

Service	Model	Product Name	SKU	New/Old	Price level	Functionality
Acronis Cyber Protect Cloud	Per-GB	Acronis Cyber Protect Cloud - Acronis Hosted Storage (per GB)	SPBAMSENS	Reused SKU from 20.08	Same	+ cyber protection functionality
		Acronis Cyber Protect Cloud - Google Hosted Storage (per GB)	SP3AMSENS	Reused SKU from 20.08	Same	+ cyber protection functionality
		Acronis Cyber Protect Cloud - Azure Hosted Storage (per GB)	SQ2AMSENS	Reused SKU from 20.08	Same	+ cyber protection functionality
		Acronis Cyber Protect Cloud - Hybrid Storage (per GB)	SPBBMSSENS	Reused SKU from 20.08	Same	+ cyber protection functionality
		Acronis Cyber Protect Cloud - Local Storage (per GB)	SP4BMSSENS	Reused SKU from 20.08	Same	+ cyber protection functionality
		Acronis Cyber Files Cloud - Acronis Hosted Storage (per GB)	SP1AMSENS	Reused SKU from 20.08	Same	Same
		Acronis Cyber Files Cloud - Hybrid Storage (per GB)	SP2AMSENS	Reused SKU from 20.08	Same	Same
		Acronis Cyber Notary Cloud - eSignature (per file)	SQ5AMSENS	Reused SKU from 20.08	Same	Same
		Acronis Cyber Notary Cloud - Notarization (per notarization)	SQ4AMSENS	Reused SKU from 20.08	Same	Same
		Acronis Cyber Notary Cloud - Acronis Hosted Storage (per GB)	SQ6AMSENS	Reused SKU from 20.08	Same	Same
Advanced Functionality		Advanced Backup - Server	SRDAMSENS	New SKU	new price	new
		Advanced Backup - VM	SREAMSENS	New SKU	new price	new
		Advanced Backup - Workstation	SRFAMSENS	New SKU	new price	new
